- Exercise stress Tests (ETT) / (Lead Role). I assist doctors in the Rapid access chest pain clinic with the patients who require stress Exercise tests.
- Tilt Test
- Spirometry & ABPIs
- Update & maintain correct patient data
- Manage new patients (in case of abnormal ECG or other investigations results), for further investigation.
- Involved in day to day running of Cardiology outpatient Dept in busy NHS hospital.
- Ensuring a safe work environment for patients and fellow medical staff.
- medical history of a patient to ensure they have no allergies etc.
- If necessary, refer to A&E.

In my role, I have been producing professional reports in Cardiology Diagnostic dept. Also, I had the opportunity to teach the University students on clinical rotation. (ECG and medical data interpretation).

May 2014-September 2014: Clinical Attachment:

CROYDON UNIVERSITY HOSPITAL, London - UK (A & E Department)

My Experience: I had a great opportunity to observe the clinical practice under direct supervision of a lead Consultant in A&E specialty at a university teaching hospital. In most days, i was shadowing a registrar and under his supervision & with Patient's consent i was performing the examinations. Also, i discussed all medical reports

(Including: Blood tests results, X-Ray and ECGs, Dip stick, etc.) with supervising Doctor and suggested the provisional diagnosis. I learned a lot about safe medical practice and gained invaluable experience and hands on skill during this period. I have closely observed how different staff (Nurses, HCAs, receptionist, doctors of different specialties & grades, etc.), work together in one team.
